

Readme

World Scientific has produced a style/template document for MSWord, which will allow authors to prepare manuscripts that can be brought directly into the World Scientific production process for CRC titles of the proceeding size [11 in x 8.50 in]. This will enable more accurate production of page proofs, reducing your need during proofreading to locate typographic mistakes.

Installing the style file

The World Scientific Word templates and sample files are located on the website in a zip format called **ws-procs11x85_word.zip**. Download and unzip this. Once unzipped successfully, you will find the following files:

procs-readme11x85_word.pdf : preliminary guide
ws-procs11x85_word.dot : style/template file
ws-procs11x85_word.pdf : sample typeset pages using the above listed template

Using the style file

Please copy the “ws-procs11x85_word.dot” onto your default templates directory (this will normally be something like C:\Program Files\Microsoft Office\Templates).

- To create a new document, choose New from the File menu, then select the ws-procs11x85_word template from the Template list box before clicking OK.
- To attach the template to an existing document, first open the document, and then select the ws-procs11x85_word Template from the Tools -> Templates and Add-ins menu. Press the “Attach Button” in the Templates and Add-ins dialogue and double click the appropriate template/style file from the file selector. Then ensure that the “Automatically Update Document Styles” check box is crossed before clicking on OK in the Templates and Add-ins dialogue. It is also necessary to run the macro “**WS PROCS 11x85**” to have a required page layout when you attach the template to an existing document.

Whichever method you have used, the World Scientific styles will then be available in the Styles list box on the tool bar, and in the Style dialogue box on the “Format” menu.

Applying World Scientific styles to your documents

To use a style, first select the text to which you would like to attach the style, then choose the style name from the styles list box on the tool bar or by using wsprocs11x85 ToolBar.

Applying World Scientific styles to your documents

The World Scientific styles are listed below. To use a style, first select the text to which you would like to attach the style, then choose the style name from the styles list box on the tool bar or by using `wspdocs11x85` ToolBar/Menu.

Style Name	Short cut Key	Style apply for
Title	Alt+TI	Title
Author	Alt+AU	Author
Affiliation	Alt+AF	Affiliation
Abstract	Alt+AB	Abstract
Heading 1-4	Alt+1-4	Headings 1-4
Text, Text Indent	Alt+SP Alt+TX	Para, Indented paras
Equation	Alt+EQ	Equations
Bibitem	Alt+BI	Bibitem

In addition, use the Table and Equation facilities available in Microsoft Word as required.
